PRIMAX TRACTOR OPERATED SELF LOADING MIXER

More for less
Get high profits with a reasonable investment

- Self-loading mixer operated with a tractor is available in 1.0 m³ and 2.5 m³ capacities. The tractor hydraulics and PTO shaft control the material bucket lifting and rotation of the drum. Swivel-type inner blades ensure smooth intake and discharge of material into the drum. Batch weighing system provides higher accuracy.

- The self-loading concrete mixer can be used in special construction projects such as high-speed railways, bridge tunnels, and township level highways. It can also be used for plant maintenance and repair. It is a valuable addition to your construction project, so consider getting one for yourself today!
